

NOTICE OF THE OPPORTUNITY FOR PUBLIC COMMENT

GEORGIA DEPARTMENT OF NATURAL RESOURCES
ENVIRONMENTAL PROTECTION DIVISION
AIR PROTECTION BRANCH

STATE OF GEORGIA
COUNTY OF BARROW
NOTICE OF DRAFT PART 70 OPERATING PERMIT

To All Interested Parties:

The Georgia Environmental Protection Division announces its intent to issue Part 70 Air Quality Operating Permit No. 4932-013-0076-V-01-0 to Winder Renewable Methane. The facility is to be located at 967 Carl-Bethlehem Road, Winder, Georgia. The main purpose of this permit amendment is to authorize the construction of a landfill gas (LFG) processing facility. It will purify and extract the methane portion of LFG from the Oak Grove and Speedway Landfills and inject it into an existing gas pipeline to be used as fuel. Currently, the LFG being generated by the landfill is merely combusted using a flare to prevent its release to the atmosphere, as required by federal rules. The estimated net change in emissions of each criteria pollutant is an increase of 3.13 tons per year (tpy) for PM/PM10, 4.89 tpy for SO₂, 0.20 tpy for VOC, 4.17 tpy for NO_x, and 22.69 tpy for CO. The Georgia Environmental Protection Division (EPD) has prepared this Title V Operating Permit in accordance with Title V of the Clean Air Act. This permit will be enforceable by the Georgia EPD, the U.S. Environmental Protection Agency, and other persons as otherwise authorized by law.

The draft permit and all information used to develop the draft permit are available for review. This includes the application and all other relevant materials available to the permitting authority. This information is available for review at the office of the Air Protection Branch, 4244 International Parkway, Atlanta Tradeport - Suite 120, Atlanta, Georgia 30354. Copies of the draft permit, narrative, application summary, and permit application will be available at our Internet site <http://www.georgiaair.org/> by selecting "Title V Permits Draft" under the Permitting the menu. (Please note that the Internet is generally accessible from most public libraries in Georgia.)

If copies are desired, the first 25 pages are free of charge, and every page thereafter costs \$0.10 per page. Copies will be made on a first-come, first-served basis. Files are available for review and copying 8:30 a.m. to 4:00 p.m., Monday – Friday, excluding holidays.

You are hereby notified of the opportunity to submit written public comments concerning the draft Part 70 Operating Permit. Persons wishing to comment on the draft Part 70 Operating Permit are required to submit their comments, in writing, to EPD at the above Atlanta Air Protection Branch address. Comments must be received by the EPD no later than 30 days after the date on which this notice is published in the newspaper. (Should the comment period end on a weekend or holiday, comments will be accepted up until the next working day.) The Division, in making its final decision to issue the Part 70 permit, will consider all comments received on or prior to that date.

Any requests for a public hearing must be made within the 30-day public comment period. A request for a hearing should be in writing and should specify, in as much detail as possible, the air quality related issues that constitute the basis for the request. Where possible, the individual making the request should also identify the portion(s) of the Georgia Rules for Air Quality Control and/or the Federal Rules that the individual making the request is concerned may not have been adequately incorporated into the draft permit. If a public hearing on the draft Title V Operating Permit is to be held, the date, time, and location of the hearing will be provided by a subsequent separate public notice. At such hearing, anyone may present data, make a statement or comment, or offer a viewpoint or argument either orally or in writing concerning the draft Title V permit. Any information received during a public hearing will be considered by the Division along with all other information received during the comment period when making its final decision to issue the Title V permit amendment.

Following this 30 day public comment period, the EPD will consider all comments, make any necessary changes, and issue a proposed permit to U.S. EPA. The proposed permit will then undergo a 45 day review by U.S. EPA in accordance with 40 CFR 70.8. Information pertaining to U.S. EPA's review period can be found on their website at www.epa.gov/region4/air/permits.

After the EPA review period has expired, the EPD will issue a final Part 70 Operating Permit incorporating any changes required by U.S. EPA. Copies of the final Title V Operating Permit, comments received, EPD's responses to comments, and any other relevant information will then be made available for public review during normal business hours at the office of the Air Protection Branch. A summary of comments and any changes made to the final permit will be found in an addendum to the narrative. A copy of this narrative and the final Title V permit will be added to the information already available at the Internet address given above.

For additional information, contact the manager of the Stationary Source Permitting Program, at the Atlanta address, or by phone at 404/363-7000. Please refer to this notice when requesting information.
